STUDENTS LIGHTING UP THEIR VACATION

In the last week of October, the students of our campuses traveled home for a brief ten-day vacation. Carrying with them the values and culture instilled by our institution, they went back to their villages as ambassadors of positive change.

Envisioned as the future changemakers of society, we encourage our students to engage in community service during their vacation. True to this spirit, they actively participated in service initiatives in their villages. Their

activities included cleaning their surroundings, distributing food to those in need, and imparting value-based education to young children in their communities.

The vacation was truly well spent, as the students made meaningful contributions to their villages while deepening their connection to the values they hold dear. They returned to our Gurukulam in the first week of November, reenergized and ready to continue their journey of learning and growth.

CELEBRATING OUR SUPPORTIVE PARENTS

A celebration of the invaluable volunteering of our parents who are an integral part of our ecosystem. At our institution, parents are not just observers but active participants in their children's education journey. We encourage all parents to volunteer at our institution for at least one week every year.

This tradition allows them to immerse themselves in our ecosystem and witness firsthand the nurturing environment we provide. By volunteering, parents gain a deeper understanding of our values, processes, and the

holistic education we offer to their children. It's also their heartfelt contribution in appreciation of the free education and holistic care their children receive. Parents, students, and staff come together to strengthen our community, fostering a sense of belonging and shared purpose.

We look forward to welcoming more parents to this meaningful journey. Together, let's continue to create a brighter future for our children.

Thank You for Being a Part of Our Family!

SABRE INDIA

SABRE HACKATHON SPARKS THE NEXT GENERATION OF WOMEN INNOVATORS AT SSSUHE!

The Winning Group of the Hackathon with the Sabre Team

The Department of Mathematics and Computational Science at Sri Sathya Sai University for Human Excellence, Nallakadirenhalli Campus for girls, recently hosted an inspiring hackathon in collaboration with Sabre's Women in Technology initiative. This event aimed to empower young women by sparking their interest in technology, encouraging innovation, and providing hands-on experience in solving real-world challenges.

The hackathon revolved around a website development challenge, with students divided into five teams. Each team was supported by dedicated mentors from Sabre and university faculty, fostering a supportive and engaging learning environment. To ensure participants were well-equipped, Sabre organized a comprehensive training session covering the

culture of hackathons and the technical skills required for website development. During the event, mentors were accessible online to provide technical guidance and encourage students to think creatively and collaborate effectively.

The Hackathon concluded with a valedictory session attended by Sabre representatives, Faculty & students of SSSUHE and members of the Each One Educate One Foundation. All five teams showcased their projects, demonstrating impressive technical expertise, creativity, and teamwork. A jury panel from Sabre evaluated the projects based on criteria such as innovation, functionality, design, and usability. Certificates were awarded to the top two teams, recognizing their excellence in the execution and presentation of the projects.

Sabre's team praised the participants for their remarkable technical skills and problem-solving capabilities, noting that their work was on par with industry standards. This feedback served as a significant source of motivation for the students who were attending a Hackathon for the first time. For the students, this event was transformative, enriching their technical knowledge while inspiring them to explore technology with newfound confidence and enthusiasm.

The Hackathon marked a significant milestone in the partnership between Sabre and the Each One Educate One (E1E1) Foundation. Beyond

supporting scholarship and fellowship programs for school and university students, Sabre's dedication and commitment to empowering underprivileged rural youth shone through this remarkable initiative.

The event demonstrated the exceptional potential of rural girl students to excel in technology when provided with proper guidance and opportunities. This collaboration underscores the vital role of industry-academia partnerships in fostering innovation, nurturing talent, and shaping a more inclusive and progressive future.
